

The new

X431Master

The Diagnostic Solution that puts you in control

- Acquires all the diagnostic functions of the X-431.
- Integrated hardware structure speeds communication times.
- Industry leading coverage; 38 manufacturers.
- One connector for all 16 pin applications.
- 24V operating capability to work with different voltage inputs.
- Smart ergonomic design.
- Frequent internet software updates available anywhere, anytime.
- Multi-language options.

The Launch X-431 Master is a new development of the best selling X-431 scan tool. The Master has acquired all the diagnostic functions of the X-431, with a number of improvements. An all new integrated structure, allows faster software download times, speeding up ECU communication and providing enhanced software security.

The new platform represents the highest level of diagnostic technology. Functions available include, read/erase DTC's, read datastream digitally and by waveform, component actuations, ECU coding, and other advanced functions.

One 16 pin connector is now used to communicate with all cars fitted with a standard J1962 OBD connector.

The X-431 Master has 24V operating capability enabling it to work with different input voltages, whilst providing unit protection from unexpected voltage surges.

An integrated thermal printer allows instant printing of all on-screen content, including the dynamic live data stream, and ECU identification.

The X-431 Master diagnostic kit will help your business grow by providing straight forward, ready diagnostics over a broad range of systems for most of cars found on NZ roads.

Frequently updated software makes X-431 Master an essential investment for professional workshops.

Specifications

Operating System:	Linux
Memory:	16Mb
CF Card:	512Mb
Main Unit I/O:	Universal Serial Port/Parallel Port
Power Supply:	DC12V/24V
Power:	Approx- 9W
Screen:	240 x 320 LCD Touch screen with background light
Printer:	Mini high speed thermal printer
Operating Temp:	-15°C to 50°C
Relative Humidity:	< 90%

Features

- Class leading 'cost of ownership' over two years. Two years software licence, and a three year warranty included.
- All inclusive 38 manufacturer software package.
- Complete kit, everything included. No extras to buy.
- Unique Launch software policy, no time outs, no penalties.
